

YUJILEDS[®] For Horticultural Lighting Product

YUJILEDS[®] offers customers abundant options in suitable LED model choices, including the bare chip package, phosphor-converted package, LED with optic lens, 5-in-1 package covering from 0.2W to 500W. Leveraging chip and phosphor resources, a specialized horticultural spectrum could reach up to 2.4 $\mu\text{mol}/\text{W}$.

	0.2 W	0.5 W	1 W	5W / 9W	50-100 W	100-300 W	300-500 W
Phosphor converted							
Bare chip							

Besides LED package, YUJILEDS[®] also focuses on integrated solutions of PCBA service. Because of the flexibility of YUJILEDS[®] phosphor, the fully controllable spectrum combinations become true. Now you can have a specific design of your own, and we are here to help optimize and manufacture it for you!

Customize flexible ribbon and MCPCB	Fixed spectrum	Flexible ribbon
	Tunable spectrum	Flexible ribbon
Customized size, power, density and spectrum	MCPCB
